NEW QUESTION: 2

- A. DNS Client
- B. DirectAccess Client Experience Settings
- C. Name Resolution Policy
- D. Network Connections

Answer: C

Explanation:

For DirectAccess, the NRPT must be configured with the namespaces of your intranet with a leading dot (for example, .internal.contoso.com or .corp.contoso.com). For a DirectAccess client, any name request that matches one of these namespaces will be sent to the specified intranet Domain Name System (DNS) servers.

Include all intranet DNS namespaces that you want DirectAccess client computers to access. There are no command line methods for configuring NRPT rules. You must use Group Policy settings. To configure the NRPT through Group Policy, use the Group Policy add-in at Computer Configuration Policies Windows Settings Name Resolution Policy in the Group Policy object for

DirectAccess clients. You can create a new NRPT rule and edit or delete existing rules. For more information, see Configure the NRPT with Group Policy.
